

To turn ON / OFF your Cooling/Heating

1. Press **Heat/Cool** until screen displays desired equipment mode (for example: *Cool Heat Em Heat (heat pumps only)*)

Note: If nothing displayed in this area, unit is **OFF**

Managing Cooling

1. Press **Device** (*Pgm* appears in upper right-hand corner of display & *Cool* appears below *Pgm*)
 2. Press **Day of Week** until *Mon Tue Wed Thu Fri Sat Sun* appears in lower left-hand corner of display*
 3. Press **Time Period** until *Morn* appears - bottom left of display
 4. Press **Ahead** or **Back** to input time for morning time period to begin
 5. Press **Warmer** or **Cooler** to input temperature for the morning time period
- Now that you have programmed Cooling for the *Morn* time period, *Mon-Sun*, you can repeat steps 3 - 5 to program the *Day*, *Even*, and *Night* time periods.

Managing Heating

1. Press **Device** (*Pgm* appears in upper right-hand corner of display & *Heat* appears below *Pgm*)
2. Press **Day of Week** until *Mon Tue Wed Thu Fri Sat Sun* appears in lower left-hand corner of display*
3. Press **Time Period** until *Morn* appears - bottom left of display
4. Press **Ahead** or **Back** to input time for morning time period to begin
5. Press **Warmer** or **Cooler** to input temperature for the morning time periods.

Now that you have programmed Heating for the *Morn* time period, *Mon-Sun*, you can repeat steps 3 - 5 to program the *Day*, *Even*, and *Night* time periods.

*For other programming options (weekdays, weekends, or individual days), refer to Customer Manual.

Managing Water Heater

1. Press **Device** (*Pgm* appears in upper right-hand corner of display)
Continue to press **Device** until *Water On* appears in lower center of display
2. Press **Day of Week** until *Mon Tue Wed Thu Fri Sat Sun* appears in lower left-hand corner of display*
3. Press **Time Period** until *Morn* appears - bottom left of display
4. Press **Ahead** or **Back** to input time for water heater to be on
5. Press **Water On•Off•Clr** until *Water On* appears in lower center of display

Note: For additional hot water, a 'temporary override' can be set by repeating Step #5 above. This temporary override will last for one hour before reverting back to the set program.

Temporary Override for Cooling/Heating

Press **Warmer** or **Cooler** until desired temperature is reached (T'stat will return to normal programming schedule at next programmed time change)

Vacation Settings for Cooling/Heating/Water Heater

Cooling/Heating - Press **Hold**, adjust the temperature using **Warmer** or **Cooler**

Water Heater - Press **Hold**, then **Water On•Off•Clr** until *Water Off* appears in lower center of display

Return from Vacation to Reset Cooling/Heating/Water Heater

Cooling/Heating - Press **Clear**

Water Heater - Press **Water On•Off•Clr** until you do not see *On* or *Off* under *Water*
