# Save energy with efficient ceiling insulation

**Increase your home's comfort and lower your bill with efficient ceiling insulation.** Make sure your insulation envelope and ducts are keeping the heat out and the cool in. Our **\$300** insulation incentive can help.

## HOW TO RECEIVE AN INCENTIVE:

### Find a contractor that's right for you

A participating Independent Contractor (PIC) can help you determine your insulation needs, determine if you qualify, and install new ceiling insulation to meet incentive requirements. Your \$300 instant incentive will appear as a credit on the invoice your PIC provides. Visit [GulfPower.com/partner/contractor/contacts.html](http://GulfPower.com/partner/contractor/contacts.html) to find a PIC.

### Can I install ceiling insulation myself and qualify for an incentive?

Yes! Should you choose to install the insulation yourself – you will need to meet all the requirements and apply online at [GulfPower.com/save/programs/insulation.html](http://GulfPower.com/save/programs/insulation.html) to request the incentive. You should check the requirements on our website to verify you qualify for the incentive or you can contact us prior to installing the insulation. This option does not provide an instant incentive.

## Benefits of adding ceiling insulation

- » Keeps unwanted heat out during summer and helps keep heat in during winter
- » Reduces the workload of your heating and cooling system
- » Can result in additional savings on your electricity bill

## Requirements to apply: *Only existing homes qualify.*

- » Your home's insulation must have a pre-verified current R-value of less than R-19 to receive an incentive
- » Install a minimum of R-19 to receive the incentive
- » Date-stamped photo showing the before and after R-value levels must be submitted to Gulf Power
- » Provide access to all attic spaces for Gulf Power Company or a Gulf Power Company Participating Independent Contractor (PIC) to determine incentive eligibility
