Gulf Power customers wishing to interconnect “customer-owned renewable generation” as defined by Rule 25-6.065(2)(a), to Gulf Power’s electric distribution system are required to complete this Standard Interconnection Application and execute a Standard Interconnection Agreement for the appropriate Tier. Gulf Power maintains Standard Interconnection Agreements for Tier 1 (10kW or less); Tier 2 (greater than 10kW and less than or equal to 100kW) and Tier 3 (greater than 100kW and less than or equal to 2 MW) generators. Downloadable copies of Gulf Power’s Standard Interconnection Agreements are available on Gulf Power’s website, www.gulfpower.com. Completion and submission of this Standard Interconnection Application is the first step in the process of interconnecting with Gulf Power’s electric system. Once a completed application is received, Gulf Power will execute the Standard Interconnection Agreement and forward the Agreement to the Customer for signature. Gulf Power recommends that the Customer download and review a copy of the applicable Standard Interconnection Agreement prior to submitting this Application.

1. **Applicant Information**

   Name(s): ___________________________________________ Gulf Power Account No.: ___________

   Mailing Address: ___________________________________________

   City: ____________________________ Zip Code: ____________________________

   Street Address (if different): ___________________________

   Daytime Phone: ______________ Fax: ______________ Email: ______________

2. **Facility Information**

   Facility Name/Model: ___________________________________________

   Facility fuel or energy source (e.g., wind, solar, other) ___________________________

**ISSUED BY:** Charles S. Boyett
Facility Gross Power Rating ______________ (defined as the total manufacturer’s AC nameplate generating capacity of an on-site customer-owned renewable generation system that will be interconnected to and operate in parallel with the investor-owned utility’s distribution facilities. For inverter-based systems, the Gross Power Rating shall be calculated by multiplying the total installed DC nameplate generating capacity by .85 in order to account for losses during the conversion from DC to AC).

Facility Location: ________________________________________________________________

Expected In-Service Date: ________________________________________________________

3. **Required Documentation**

As part of this Standard Interconnection Application, the Customer must submit the following documents:

(a) Technical design parameters of the Facility or the manufacturer’s installation, operation and maintenance instructions demonstrating that the Facility has been submitted by the manufacturer to a nationally recognized testing and certification laboratory, and has been tested and listed by the laboratory for continuous interactive operation with an electric distribution system in compliance with the following codes and standards, as applicable:

ii. IEEE 1547.1 (2005) Standard Conformance Test Procedures for Equipment interconnecting Distributed Resources with Electric Power Systems; and

iii. UL 1741 (2005) Inverters, Converters, Controllers and Interconnection System Equipment for Use with Distributed Energy Resources;

(b) A copy of the inspection report of the local code enforcement agency indicating compliance of the Facility with all applicable local codes;

(c) Proof of insurance, if the Facility’s Gross Power Rating exceeds 10 kW (i.e., a Tier 2 or Tier 3 generator); and

(d) A copy of the lease agreement if the Customer is leasing the Facility from a third party.

**ISSUED BY:** Charles S. Boyett
(Continued from Application, Sheet No. 9.77)

4. **Application Fee**

   If the Facility's Gross Power rating exceeds 10 kW (i.e., a Tier 2 or Tier 3 generator) the Customer must submit a non-refundable Standard Application Fee of $477 with this Application.

5. **Interconnection Study Charge**

   If the Facility's Gross Power Rating exceeds 100 kW (i.e., a Tier 3 generator), the Company may determine, upon reviewing this Interconnection Application, that an interconnection study is necessary. If the Company determines that an interconnection study is necessary, the Customer must provide the Company with an interconnection study charge deposit of $2,680 within fourteen (14) days of the Company’s request. In the event that the expenses incurred by the Company in conducting the interconnection study are less than the deposit, the Company shall refund the difference to the Customer within sixty (60) days of completing the interconnection study.
